

Dinosaurs!

features six roaring, animatronic dinosaurs including the king of dinosaurs – *Tyrannosaurus rex* – *Triceratops*, *Pachycephalosaurus*, *Dimetrodon*, *Stegosaurus* and a mother *Apatasaurus* protecting her newly hatched babies. Takes visitors beyond the bones through a primordial swamp to see how these prehistoric creatures may have looked, and sounded, when they roamed the earth millions of years ago.

Exhibit components include:

- **Seven animatronic units:**
 - T. Rex*
 - Dimetrodon*
 - Pachycephalosaurus*
 - Stegosaurus*
 - Triceratops*
 - Apatasaurus*
 - Baby Apatasaurus nest*
- Air compressor
- Silk plants, trees, wooden stanchions and decorative rubber mulch
- Detailed signage

Dinosaurs! includes these supplemental materials:

- Technical manual
- Marketing materials

Cost:

\$35,000 for 3 months (includes basic technical set-up)

Requirements:

3,000 square feet
Ability to run an airline to the compressor
(preferably from a nearby room)

Catawba Science Center strives to offer the highest quality of support for all of its traveling exhibitions.

Tyrannosaurus rex

Triceratops

Dimetrodon

Pachycephalosaurus

Apatasaurus

Baby Apatasaurus nest

Stegosaurus

When visitors step foot back in time — and into the primordial swamp — they're greeted by a towering, roaring half-sized *T. rex*. Further into this immersive, prehistoric exhibit scape, visitors get an up-close look at how dinosaurs and ancient reptiles looked and sounded millions of years ago. Create an element of surprise and stage a hatching of eggs in the baby apatasaurus nest. Silk plants, trees, wooden stanchions and decorative wooden mulch provide the base for creating your own primordial swamp.
