

The new age of Al

Johanson.S@microsoft.com

Empowering others

Our mission is to empower every person and organization on the planet to achieve more.

66 For the first time, we have the access to Al that is as empowering as it is powerful."

Satya Nadella

The next platform shift

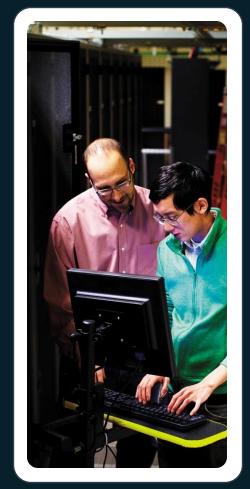

Artificial Intelligence

Machine Learning

Deep Learning

Generative Al

Artificial Intelligence

the field of computer science that seeks to create intelligent machines that can replicate or exceed human intelligence

Machine Learning

subset of AI that enables machines to learn from existing data and improve upon that data to make decisions or predictions

2017

Deep Learning

a machine learning technique in which layers of neural networks are used to process data and make decisions

2021

Generative Al

Create new written, visual, and auditory content given prompts or existing data.

Why Generative AI is a significant step forward in AI

Task-Specific Machine Learning Models

Custom vision

Text to speech

Speech to text

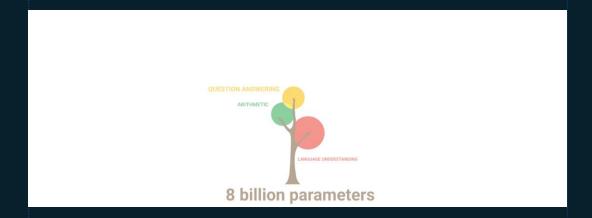

Translation

Classification

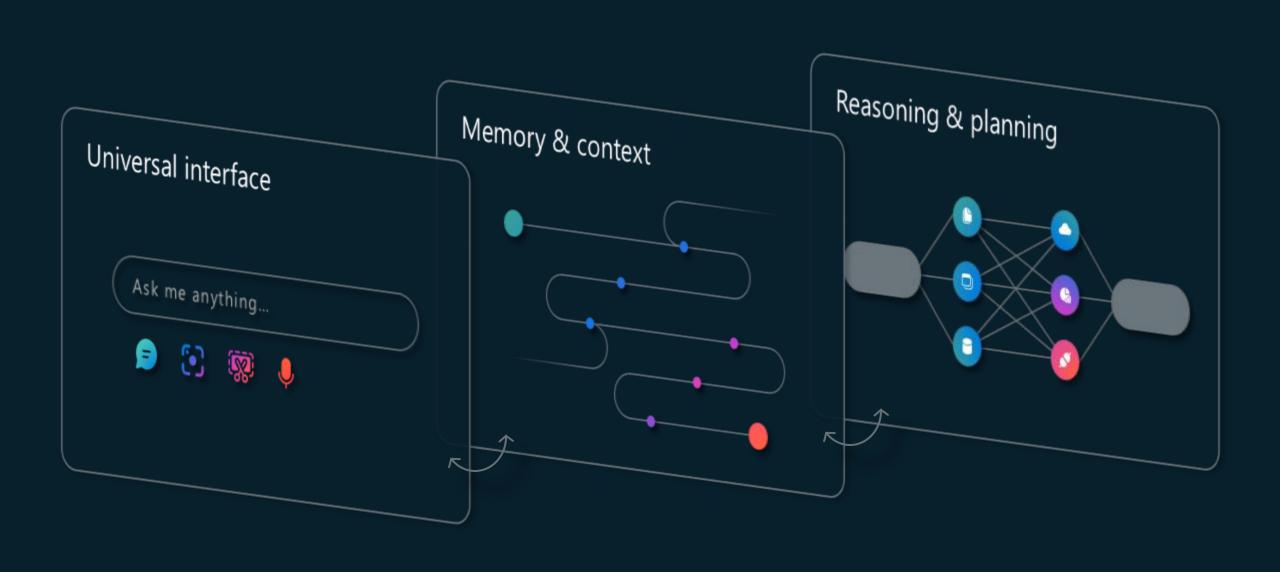

Object recognition

- Labor intensive and time consuming to develop, deploy, integrate.
- Limits their use to smaller, more focused problems
- Need a lot of highly structured, often labeled, data

Large Language Models

- One simple API replaced most NLP models
- New emergent capabilities
- Don't need any customer data to train a model leverage the foundation model directly
- Will continue to get more powerful.

Era of Copilots

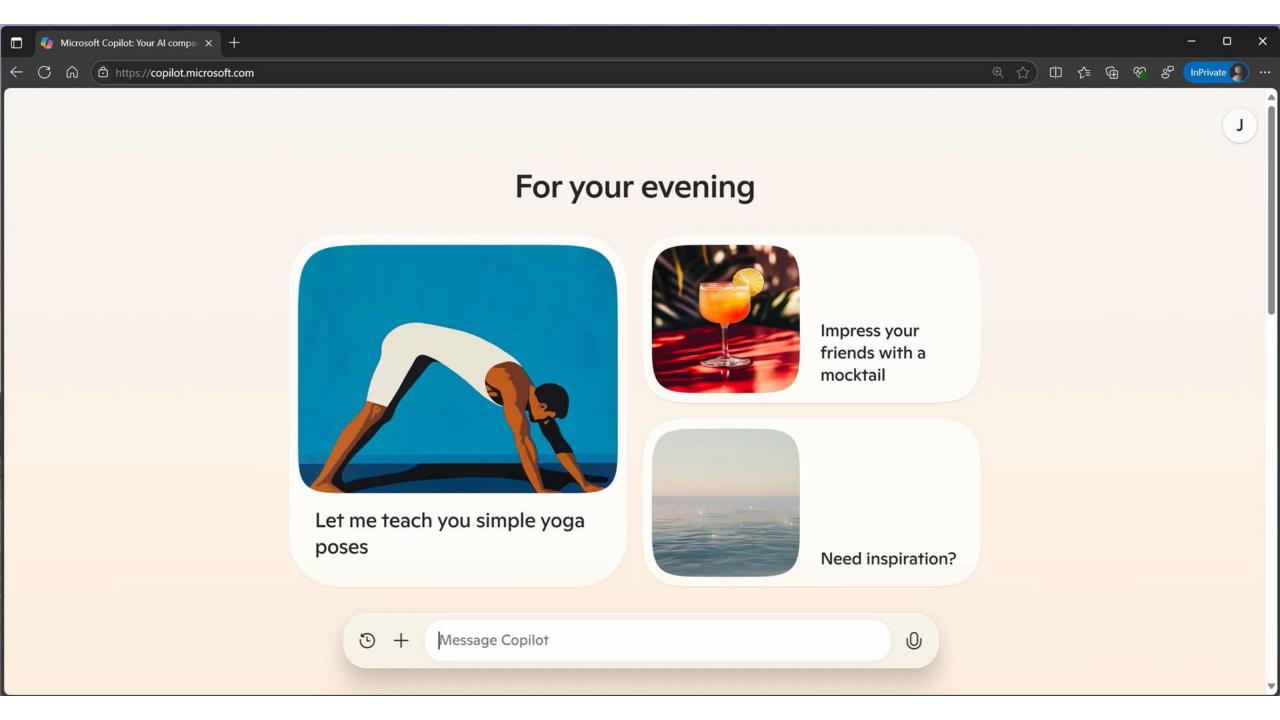

Al as a real-time collaborator

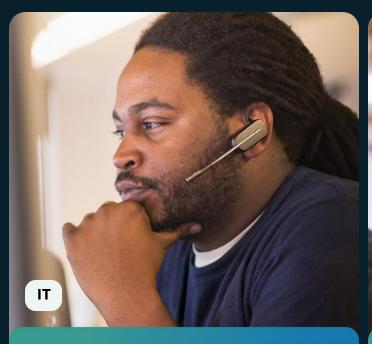

..that generates content

...that sparks creativity

...that automates cognitive tasks

...that completes work

36% increase in self-help success rate

9.4%
higher revenue per seller
and 20% more deals closed

42% greater accuracy in answering employee questions

5% reduction in extregulatory spen

Examples: Empower Everyone with AI in Education

Al transformation opportunities

Enrich employee experiences

Reinvent customer engagement

Reshape business processes

Bend the curve on innovation

The five drivers of Al value

Organization & Culture

- Do you have a defined operating model to industrialize the adoption and use of AI?
- Do you have topdown support?

Business Strategy

- What business outcomes are you driving?
- How can AI help you achieve those outcomes?

Applied Al Experience

- Do your people have diverse experiences and skills with AI?
- Is your organization collaborating to build experience?

Al Governance

- Are you implementing processes and controls that are transparent?
- Are you governing data privacy and security?

Technology Strategy

- Do you have access to quality data?
- Is your infrastructure set up to help you scale?

We have an exciting future ahead.
